

+ This board is made from sustainable bamboo. Made using ethical resources, FDA approved, naturally anti-bacterial, ecologically friendly, stronger than hardwood, incredibly durable.

+ After harvesting, bamboo grows back and can be re-harvested every 4 ½ years. Bamboo does not need re-planting. Most hardwoods have a 30 to 60 year growth cycle and then need to be replanted once harvested. Bamboo is the most sustainable wood source in the world.

+ Designed with earth-friendly living in mind, the Chef inox board is crafted from mountain grown, naturally

occurring bamboo and is free from formaldehyde based adhesives, dyes, or stains.

+ This original, sleek board is a mixture of creative design and smart engineering. The boards features naturally coloured, opposing grain, giving the board a fetching aesthetic look and prevents warping with its unique design. Perfect as an all purpose board, the recessed centre makes an ideal surface for serving a multitude of different foods. The board is reversible.

+ Packaged for retail sale.

+ Hand wash only
