INTRODUCTION

Welcome to Volume 20 of our ICE catalogue. We have tried to modernise the look, hopefully without compromising the old easy to navigate format. The electronic soft copy is available for download on our website.

FREIGHT, LOGISTICS and WAREHOUSING

We are very proud of the fact that we were able to maintain the freight matrix through the recent fuel crisis, without introducing any freight surcharge. Hopefully fuel costs will remain stable and we will be able to honour the new freight matrix for the next 12 months. In order to continue offering free into store to all distributors premises countrywide, we have had to make some minor changes.
We have added an extra category called EXTRA SMALL (XS) to our freight matrix. This allows us to ship smaller items of refrigeration at a more economical rate than the previous.
The freight matrix has proven to be nice and easy to manage, and as we did in the previous catalogue, all items that are not FIS to dealers, are marked with a **XS, S, M, L or L+.**

XS S M L L+

These codes refer back to the freight matrix, which will then provide the freight charge to your warehouse depending on where you are located.
We currently hold stock of all 6 models of the NDA range of supermarket refrigeration and freezers in our Sydney warehouse, as well as third part logistics warehouses in Melbourne and Brisbane. These are available to be collected without a freight charge or be delivered at local freight rates.

DISTRIBUTOR AREA

We encourage all distributors to register on our website. This will enable you to gain access to instant freight quotes for most of our products, to all suburbs in Australia. It also give you access to our full library of images, brochures, logos, current data file and freight matrix. There is also a **GEMS** section, which enables you to check and compare the running costs per annum of commercial fridges or freezers currently registered with the GEMS program.
We encourage all dealers and their staff to register in our distributor area on our website. This gives you access to be able to instantly check live stock, as well as receive freight quotes for single or multiple items to any post code in Australia. Some refrigeration, as well as a few of the very large items, are still not on this quoting system, so please email freight@internationalcatering.com.au if your selected item is not available.

NEW PRODUCTS

We have added some exciting new products to the range, some of which are shown below.
These are all marked with the NEW symbol in the catalogue.

3 month warranty on jugs

Blender jugs are a consumable item and are not covered by the warranty on the motor. The manufacturer recommends replacing the jugs every 12 months. However this is a guide only and depends on usage, number of jugs in the system and washing methods. Jugs are dishwasher safe but NOT dishwasher proof. Washing in a dishwasher will significantly reduce the lifespan of the polycarbonate jug. Continuing to use jugs once the bearings are worn can result in damage to the motor which will void the warranty

RUNNING COSTS

HOW TO CALCULTAE ANNUAL RUNNING COSTS OF A REFRIGERATOR

Simply take the number of kW/24hr and multiply it by $0.30 (average cost of small business electricity) which will give you the daily running cost, then multiply that by 365 which will give you the approx running cost per annum.

E.g: NDA1875: 11.46 kW /24hr x $0.30 x 365 = $1,254.87 per annum
